Company name:- MAKITA POWER TOOLS|Dec24 – Present|

Designation: Sales Engineer

Project name:-|CRM| Agile

Project description:- The Lead Management System project for Makita Power Tools focused on streamlining the process of capturing, tracking, and managing leads from dealers, distributors, and end customers. The goal was to enhance conversion rates, improve communication between sales teams and service centers, and boost overall sales efficiency through digital automation and data-driven insights.

Role:-Business analyst

Responsibilities:

- Facilitated Agile ceremonies, including **Sprint Planning, Daily Stand-ups, Sprint Reviews, and Backlog Grooming**, to ensure smooth coordination between stakeholders, sales teams, and the development team.
- Gathered, analyzed, and prioritized requirements using **MoSCoW and user story techniques**, aligning ERP functionalities with Makita’s lead management and dealer engagement objectives.
- Developed detailed **Business Requirement Specifications (BRS)** and **Software Requirement Specifications (SRS)** for Sales and Dealer Management ERP modules.
- Conducted **GAP Analysis** between manual sales processes and the proposed automated system, identifying opportunities to improve lead follow-up, quotation tracking, and performance reporting.
- Led **User Acceptance Testing (UAT)** sessions with regional sales teams to validate system functionality against operational and business goals.
- Utilized **Jira and Confluence** to manage user stories, document process flows, and track project progress, ensuring transparency, alignment, and Agile compliance across departments.
- Drove sales growth by identifying new business opportunities, managing dealer networks, and providing technical solutions for Makita power tools.
- Delivered product demonstrations, offered technical guidance, and trained dealers and end-users to ensure proper application and customer satisfaction.
