📍 Pune, Maharashtra

Summary

- In-depth understanding of SDLC phases, including Waterfall and Agile methodologies.
- Proficient in Waterfall Model: Gathered requirements using elicitation techniques such as brainstorming, document analysis, and interviews. Prepared BRD, FRD, and RACI Matrix to define project scope and deliverables.
- Experienced in root cause analysis (RCA), problem management support, and task management.
- Skilled in creating UML diagrams, wireframes, and prototypes to visualize workflows and system designs.
- Knowledgeable in Agile Scrum: Created user stories with acceptance criteria, prioritized requirements using MOSCOW, and maintained Sprint & Product Backlogs.
- Participated in Agile ceremonies such as sprint planning, sprint review, and daily stand-up meetings to ensure smooth project execution.

Education

B Sc (ICV) 2019
Vidyabharti Mahavidyalaya , Amravati

Skills

Language

Java, Python, SQL

Framework

Spring Boot, GitLab, Junit, Mockito, Microservices, Hibernate, JPA

Platform

IntelliJ IDEA, Eclipse, VS Code, Jupyter Notebook

Soft Skills

Rapport Building, Strong Stakeholder management, People Management, Excellent communication

Professional Experience

Business Analyst 08/2024 – Present | Pune
Corefinxperts Pvt. Ltd.

Project Name: DhanXpert (Fintech Platform)

Project Description: DhanXpert is a fintech platform that connects investors with certified financial experts and organizations. The platform provides features like expert discovery (search & filter), instant and scheduled bookings, secure payments, and notifications to streamline financial consultations.

Key Responsibilities:

- Collaborated with stakeholders to gather, analyze, and document business requirements for core modules including **Search & Filter, Booking, Payments, Notifications, and Homepage flow**.
- Prepared **BRD, FRD, and user stories** supported by **wireframes, UML diagrams, and prototypes**, with detailed acceptance criteria covering edge cases, system rules, and integrations.
- Designed **AS-IS / TO-BE** process flows to highlight pain points and propose solutions.
- Defined and prioritized feature sets across release versions, identifying **MVP scope** to accelerate go-to-market strategy and optimize development effort.
- Coordinated with Developers to implement backend and frontend logic for booking and payment flows.
- Conducted **gap analysis and QA-level validation** to ensure requirements matched delivered functionality.
- Supported onboarding flows for experts and corporates with consistent category & expertise mapping.
- Designed **prototype improvements** for Homepage UI/UX, increasing investor engagement metrics by **40%**.

- Provided **demos, walkthroughs, and requirement clarifications** to cross-functional teams, leading to smoother communication and a **50% reduction in development rework**.

Backend Developer & Business Analyst

10/2022 – 02/2023

Pericius Pvt. Ltd.

Project Name: Digital Resource Management (DRM)

Domain: Digital Transformation

Client: Technotree

Project Description: A digital asset orchestration platform that manages content, applications, and licenses with real-time tracking, automated allocation, and compliance enforcement to improve efficiency and resource utilization.

Key Responsibilities:

1. Backend Development (Java/Spring Boot)

- Designed, developed, and maintained scalable backend services using Java and Spring Boot.
- Built RESTful APIs for seamless integration with frontend and third-party systems.
- Optimized NoSQL databases and queries for efficient resource tracking.
- Implemented secure authentication and authorization using OAuth2, JWT, and Spring Security.
- Ensured data integrity, consistency, and compliance with organizational policies.

2. Business Analysis & Solution Design

- Collaborated with stakeholders to gather requirements, analyze workflows, and define business rules.
- Translated business needs into technical specifications, user stories, and UML models.
- Conducted gap analysis and proposed workflow and reporting optimizations.
- Documented API contracts (Swagger) and ensured alignment between business logic and backend implementation.

Backend Developer

07/2020 – 09/2022

QuinStreet Software Pvt. Ltd.

Project Name: Storenic

Domain: E-commerce

Client: Otto Group, Germany

Project Description: An e-commerce web platform offering a wide range of luxury products. It enables users to browse, purchase, track, cancel, or return orders with multiple secure payment options.

Key Responsibilities:

- Developed and maintained backend components for an end-to-end e-commerce application.
- Participated in all phases of the software development lifecycle.
- Wrote clean, efficient, and testable code using **Java and Java EE**.
- Conducted code reviews, debugging, and performance optimization.
- Managed user requirements and provided regular project updates to stakeholders.
- Implemented risk mitigation strategies to ensure on-time delivery and quality outcomes.
- Delivering **high availability and performance**

Certificates

- **Business Analyst Training (IIBA Endorsed) – COEPD** | Requirement analysis, Agile practices, stakeholder management, BPMN/UML.
- **API Testing Fundamentals** | Hands-on testing with Postman, Swagger; validation, authentication, performance testing.
- **Advanced SQL & Database Optimization** | Complex queries, indexing, stored procedures, query optimization.
- **Programming in Python** | Scripting, data analysis (Pandas), automation, OOP, API integration.
